CODING

“All of my friends who have younger siblings who are going to college or high school - my number one piece of advice is: You should learn how to program.”

Mark Zuckerberg

1

Introduction to Scratch

15 classes

Block-based programming, Overview of Scratch, Scratch interface & its components, Adding Sprites, Playing with Sprites, First Scratch Program, Backdrops, Fun with Backdrops, Sound and Music effects.

2

Animation & Story Telling through Coding

15 classes

Scratch Blocks and Categories, Animate a Sprite, Pixels and Coordinate plane of the stage, Animated Creatures, Sequencing and Looping, Conditionals and Controlling, Dialogue and Narration, Working with Events, Story Creation.

3

Gamify it!!

15 classes

Sensing in Scratch, Sensing Sprites, Arithmetic operations, Paint in Scratch, Math Concepts, Introduction to variables, Creating Variables, Introduction to lists, Creating Lists, Performing List Operations.

Practical Coding

Projects

(10+ Projects/15 Classes)

- Music Band
- Dance Party
- Talk Show Animation
- Apple Catcher
- Math Quiz
- Maze Game
- Catch me if you can

Assessments

(Competitive + Mental)

- 50+ learning sheets
- 2+ Monthly Quizzes
- 15+ Advanced sheets
- 60+ Practice sheets
- 50+ Revision sheets
- 60+ Hours of Coding Lessons

KASHCLASSES

- We do real-world problem-solving. The student learns to see coding all around them
- We offer a lot of advanced coding content. The student can work on topics that are beyond prescribed textbooks

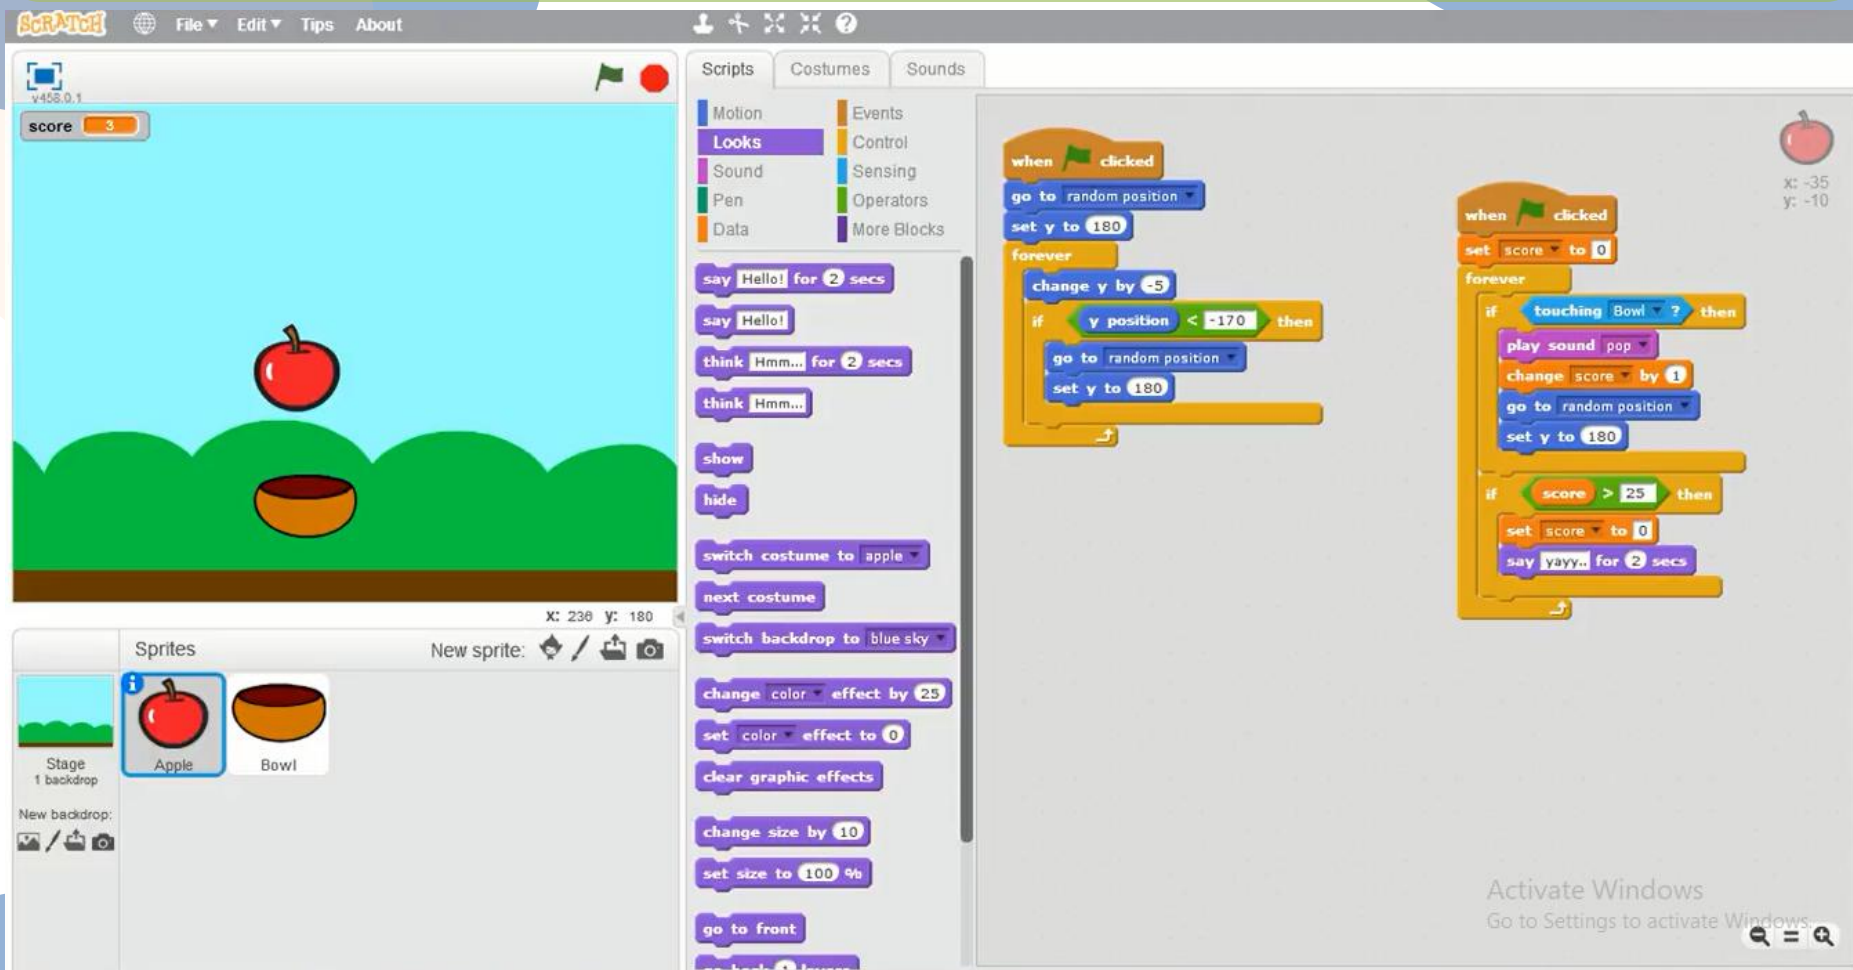

1:1 Attention

The teacher always interacts 1:1 with the students via video, audio and chat

Fast Progress

This is because the students actively solves problems in every class

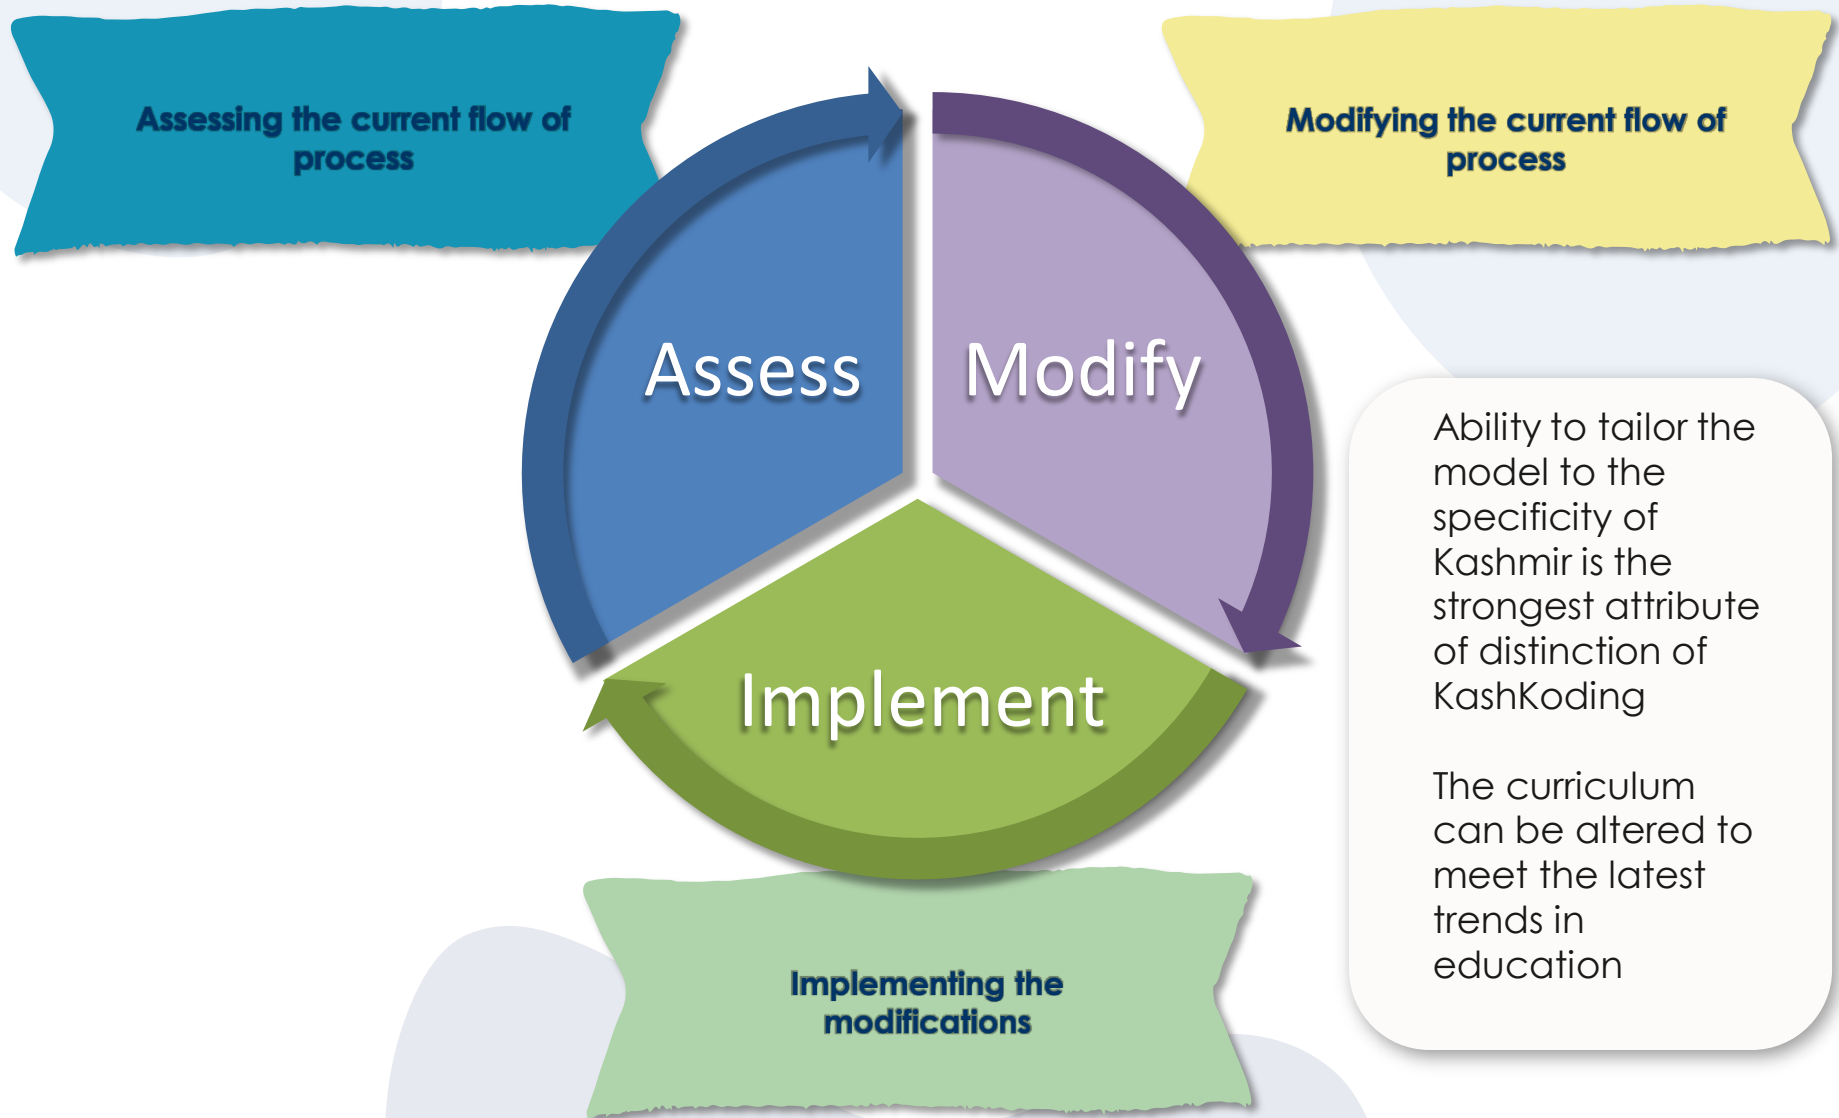

"Coding is the language of the future, and every girl should learn it."
Reshma Saujani

2+ times/week

Class frequency is 2-3 times/week
depending on grade & preference.

THE SECRET OF STABILITY FOR THE SYSTEM

Thank you!
